DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-11, 13-16, 18 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chaffey (G.B. Patent No. 2,102,661) in view of Koster.

Chaffey discloses a connecting device for a spray boom to a chassis of an agriculture comprising: a single deformable quadrilateral 12/30/36/24 arranged in a plane which is substantially vertical and parallel to a longitudinal plane of the sprayer, a vertical mid-plane 24, an actuator 54 to deform the quadrilateral 12/30/36/24, a trapezium quadrilateral (figure 3), an upper arm 30; and a lower arm 36. Chaffey fails to disclose a single quadrilateral. However, Koster discloses a single quadrilateral 10 (figure 1). Therefore, it would have been obvious to one having ordinary skill in the art to have provided the device of Chaffey with a single quadrilateral as suggested by Koster. Doing so would provide a simple and effective connecting device.

3. Claims 1-11, 13-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Boncser (G.B. Patent No. 2,098,841) in view of Williamson et al.

Boncser discloses a connecting device for a spray boom to a chassis of an agriculture comprising: a single deformable quadrilateral 14 arranged in a plane which is substantially vertical and parallel to a longitudinal plane of the sprayer, a vertical mid-

plane, an actuator to deform the quadrilateral, a trapezium quadrilateral (figure 2), an upper arm; and a lower arm. Boncser fails to disclose a single quadrilateral. However, Williamson discloses a single quadrilateral 10 (figure 1). Therefore, it would have been obvious to one having ordinary skill in the art to have provided the device of Boncser with a single quadrilateral as suggested by Williamson. Doing so would provide a simple and effective connecting device.

Allowable Subject Matter

4. Claim 12 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments filed November 27, 2002 have been fully considered but they are not persuasive.

6. Applicant's arguments with respect to claims 1-19 have been considered but are moot in view of the new ground(s) of rejection.

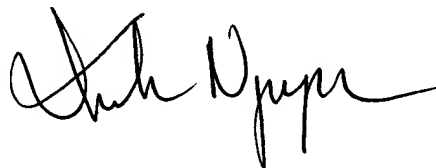

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dinh Q Nguyen whose telephone number is (703) 305-0248. The examiner can normally be reached on Monday-Friday from 6:30 AM to 4:00 PM.
